Notes

The image shows a page from a notebook or ledger designed for seed counting. On the left side, there are two identical seed counting grids. Each grid consists of a 12x12 square array of small squares. To the right of each grid, the numbers 1 through 12 are listed vertically, corresponding to the rows. Above each grid, the numbers 2048, 1024, 512, 256, 128, 64, 32, 16, 8, 4, 2, and 1 are listed horizontally, corresponding to the columns. A small icon of a seed is located at the top left of the first grid. To the right of the grids is a large rectangular area labeled "Notes" at the top, which contains several horizontal lines for writing.
